

Pellissippi State Community College Approved Cloud Services

The appropriate use of an approved cloud service is only for the institutional information as classified in the [Cloud Computing policy](#). Pay special attention to access levels when sharing files and folders with other collaborators to ensure that data is not inappropriately shared. You may not use your personal cloud services account to collect, process, or store data covered by laws such as HIPAA, FERPA, FISMA, and GLBA.

For more information, please contact the director of Networking and Technical Services or the vice president of Information Services.
